

Notes:

1. Work with the sound team to set-up John's stage, 2 projectors and 2 screens.
2. Set up the perpendicular chairs (red colour). On each side of the gym there are 5 going east/west and 7 going north/south. There is only one in the first row. The west side is stretched out because there is more room.
3. Start filling in the spaces using a circular pattern.
4. Rows 3,4,5,6 have extra seats towards the stage. (grey colour).
5. At Row 4 start a diagonal aisle after the 6<sup>th</sup> chair
6. Only go up to the diagonal aisle on Row 7
7. This design uses about 150 chairs. Add Rows 8, 9 if more required
